

I am a subscriber to XM Satellite Radio and elect to subscribe because of all of the services offered. Most important to me is the traffic and weather channel since this info is not available to me otherwise in my local area. I believe I have a right to these services that I purchase because I felt they were important to me. I do not feel that the NAB has the right to decide what I can and cannot have with regard to what I can listen to on my radio. If they had better services available free to people, it would not be necessary for me to spend money on info that I feel is important. Living in the Northeast US the daily traffic and weather info is important in order to just be able to plan my life each day.

I respectfully ask you to reject NAB's petition 04-160. This petition might be good for them but not for the working people.
